Full-stack developer specializing in **MERN**, **AWS** and **Machine Learning**, building scalable backend systems, APIs and modern web applications.

ACHIEVEMENTS

- Advanced to **interview stage**, **Google Girl Hackathon 2025** and cleared **national-level shortlisting in Smart India Hackathon (SIH)** among **50,000+** teams.
- LeetCode Knight** (1800+ rating) – solved **900+** DSA problems and actively participated in weekly and biweekly contests.
- Cleared **multiple rounds** in **Flipkart GRiD 7.0** and **Amazon HackOn 2025** among **1.5 lakh+** participants nationwide.
- Selected for **Kasparro AI Challenge** among **5,000+** participants for AI-driven product recommendation workflows.

PROJECTS

KIIT ParkEase | *Python, YOLOv8, FastAPI, AWS, Redis, Leaflet* | **Selected for Faculty Research Publication** *Feb 2026*

- Engineered **AWS Lambda + S3** event-driven image pipeline with YOLOv8 on a self-collected dataset of **400+ annotated images**, achieving sub-**200ms** vehicle detection.
- Architected smart parking system on **AWS EC2** serving **150+ slots** across **6+ locations** via FastAPI and Redis caching, supporting slot reservation, dynamic recommendations and real-time navigation.
- Implemented RBAC and distributed session handling with CloudWatch monitoring, Twilio alerts, reducing dashboard load time by **40%** across concurrent parking sessions.

PulseRoom | *Next.js, FastAPI, PostgreSQL, Redis, WebSockets, Google OAuth* *Sep 2025 – Nov 2025*

- Designed a real-time collaboration platform with room creation, live updates, notifications, supporting **50+ rooms** with sub-**250ms real-time synchronization** processing **10,000+** live events.
- Scaled backend infrastructure with **Google OAuth**, JWT authentication, **RBAC**, distributed WebSocket event handling and PostgreSQL storage, improving API throughput by **45%** and synchronization consistency across sessions.

SpillIt | *React.js, Node.js, Express.js, MongoDB, Prisma, Cloudinary* *May 2025 – Jul 2025*

- Built an anonymous social prediction platform with gamified polls, outcome reveals and personalized trending feeds, handling **1,000+** anonymous submissions.
- Developed moderation pipelines, **feed-ranking** algorithms and user reputation system using **Firestore Auth**, Prisma ORM-backed MongoDB storage and **Cloudinary** media workflows, reducing feed latency by **28%** for **10,000+** daily content requests.

TECHNICAL SKILLS

- Languages:** C, C++, Java, Python, JavaScript (ES6+), TypeScript
- Web Development:** React.js, Next.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, REST APIs, WebSockets
- Libraries & Frameworks:** NumPy, Pandas, scikit-learn, TensorFlow, PyTorch, OpenCV, YOLOv8
- Databases & Cloud:** MongoDB, PostgreSQL, Redis, AWS, Google Cloud, Docker, Kubernetes, CI/CD
- Tools & Practices:** FastAPI, JWT, Google OAuth, Postman, Git, GitHub, Linux, System Design

EXPERIENCE

Data Science Intern *May 2024 – Jul 2024*

Teachnook in collaboration with Wissenaire (IIT Bhubaneswar) *Remote*

- Built **supervised ML models** (Random Forest, Gradient Boosting, Ridge Regression) achieving **92% accuracy** and F1-score of **0.88** on real-world datasets.
- Architected end-to-end **scikit-learn pipelines** with Grid Search tuning via K-Fold cross-validation reducing model training time by **30%**.

EDUCATION

- Kalinga Institute of Industrial Technology (KIIT)**, Bhubaneswar *2023 – 2027*
Bachelor of Technology in Computer Science & Engineering *CGPA: 9.44*
Coursework: Data Structures & Algorithms, OOP(Object Oriented Programming), Operating Systems, Computer Networks, DBMS, Distributed Systems, Agile Methodologies
